

To our Clients

Re: Information regarding the REACH Regulation (EC) 1907/2006 – “SVHC” substances pursuant to Art 7, Paragraph 1

Dear Valued Customer:

We are pleased to inform you that under normal use conditions, substances in the PLASTIC CONTAINER items produced by Plastica Panaro are not emitted, therefore, in accordance with the regulation in question, no registration of the manufactured items is required of Plastica Panaro.

Regarding the information we have received from suppliers, the raw materials supplied and used for the manufacture of our products (excepting raw materials not covered by the REACH Regulation (EC) 1907/2006) have been pre-registered by our suppliers and do not contain any substances of very high concern (SVHCs) or any included on the **Candidate List** published by the European Agency.

Please note that Plastica Panaro does not conduct routine analyses to confirm the veracity of the statements it receives from suppliers, neither does it intentionally add any substance of very high concern (SVHC) or any included on the Candidate List to its production processes.

Therefore, to the best of our current information, as per the regulation in question in this declaration, no substances of very high concern (SVHCs) or any included on the Candidate List exist.

Trusting that you will take due note of this information, we would also like to take the opportunity to extend our warmest regards.
